

Workers' Comp & Hanford

Don't go by experience alone,
understand your rights under the law

We will discuss both state & national programs including:

Federal Department of Labor (DOL)

Department of Energy

Washington's Department of Labor and Industries (L&I)

Veterans' Administration

The unique risks for workers at Hanford require a good understanding of Workers' Compensation Benefits.

Join us for a discussion on navigating the maze of both state and federal programs available to protect your health.

You will hear from staff from the Washington State Labor Council and the United Steel Workers about how these programs will impact the health of every worker on site.

RSVP: Joe Kendo
WSLC Leg. & Policy Director
